Mr. Harold Weisberg
Hyattstown, Maryland

Dear Harold:

Enclosed is a revised, updated and expanded version, as of May 1, 1967, of my earlier monogram on "What The Photographs Show." It is not substantially different from my April 1 piece except that I have eliminated the THEORY section and have listed missing or unobserved photographs appearing on the big chart (Exhibit 1).

The exhibits are not enclosed but are available upon request. They are in a continual state of flux as I see and analyze new photographs. Only one serious error appeared in my April 1 monogram. The Nix film does not show man #2. The observer working with me who gave me this information mistook Zapruder's legs for a man. This optical illusion occurs if one views Nix in normal motion.

However, you will note Man #2 does appear in Zapruder.

Regards,

A handwritten signature in cursive script, reading "Dick Sprague".

Richard E. Sprague
